PROFILE

Curious and motivated Data Analyst with a strong interest in transforming data into useful insights. Skilled in Excel, SQL, Power BI, and Python, I combine technical and analytical abilities to help businesses understand their performance and make better decisions. I enjoy automation, clear storytelling, and working with clean, structured data that brings real value to organizations.

EXPERIENCE

Data Analyst — Compar Assurance

January 2026 – Present · Remote · Marketing Performance Analytics

- Designed an end-to-end marketing analytics pipeline integrating data from Meta Ads, Google Ads, Google Search Console, Google Tag Manager, and internal databases.
- Collected, cleaned, and transformed multi-source marketing data to prepare reliable, analysis-ready datasets for reporting.
- Developed interactive Power BI dashboards featuring executive KPIs, campaign performance, lead generation, conversion funnels, and marketing insights.
- Created data models, DAX measures, and automated reporting workflows to deliver actionable business insights and support data-driven decision-making.

KEY SKILLS

Data Cleaning & Transformation (SQL, Python – Pandas) Data Visualization & KPI Reporting (Power BI) Business Insights & Forecasting
Dashboard Design & Storytelling ETL and ELT Pipeline Automation Report Automation & Performance Tracking

Tools: PostgreSQL, Python, Power BI, Excel

PROJECTS

Financial Fraud Risk Analytics Pipeline

PostgreSQL · Python (Pandas, XGBoost) · Power BI

- Built a complete analytics pipeline combining SQL-based ETL, ML modeling, and BI visualization.
- Developed fraud-specific indicators in SQL, including transaction ratios and temporal spending patterns.
- Trained, tuned, and compared supervised models, selecting XGBoost for its high recall and stability.

Fraud Detection Dashboard – Fraud Analytics

PostgreSQL · Python (Pandas, XGBoost) · Power BI

- Engineered predictive features using PostgreSQL, creating user-level metrics like 24-hour transaction counts and 7-day rolling averages.
- Trained and evaluated machine learning models in Python, identifying XGBoost as the top performer with 0.98 ROC-AUC.
- Designed an interactive Power BI dashboard to visualize temporal fraud patterns, high-risk users, and model performance.

HR Attrition Analytics & Retention Pipeline

PostgreSQL · Python · Power BI

- Designed a full ETL-to-dashboard pipeline analyzing employee attrition, with a normalized star schema in PostgreSQL for HR data modeling.
- Built Python scripts for feature engineering and BI-ready exports, and delivered Power BI dashboards with key KPIs (attrition %, satisfaction, tenure, diversity).

Car Sales Dashboard – Performance Analytics

SQL · Python · Power BI

- Analyzed pre-owned car sales data to identify sales trends, customer behavior, and dealer performance, using an automated ETL pipeline built in PostgreSQL and Python.
- Built a two-page Power BI dashboard displaying KPIs, sales evolution, and dealership rankings, and delivered recommendations to improve inventory mix and optimize marketing campaigns.

Pharma Sales Dashboard – Analytics & Insights

SQL · Python · Power BI

- Designed a Power BI dashboard to analyze product performance, sales volume, and transaction patterns, tracking KPIs such as total amount, boxes sold, and average sale value.
- Identified top products, sales reps, and regions to guide management decisions, and suggested actions to improve sales coverage and product distribution.

Smart Budget – Intelligent Finance Assistant

Streamlit · AI (LLaMA, Hugging Face)

- Developed a personal finance web app that helps users manage spending through AI-powered insights, with multilingual support and real-time dashboards.
- Added full CRUD functionality for expense management and data visualization, focused on automation, user experience, and intelligent budgeting recommendations.

EDUCATION

Bachelor's Degree in Business Analytics, AI & Big Data

2024 – 2025 · EMAA Business School, Agadir

Higher Diploma in Computer Science

2022 – 2024 · EFET, Agadir

LANGUAGES

English Arabic French
